EDUCATION

The Polytechnic of Ibadan O.N.D Computer Science [Sep. 2021 - July. 2023]

SKILLS/TECHNOLOGIES

Javascript, Typescript, ReactJs, NextJs, NodeJs, Express.Js, Prisma, MySQL, Mongo DB, Css, Tailwind, Bootstrap, Php, Laravel, Github

EXPERIENCE

Frontend developer [intern]- **Enforca Technologies**   [Jan. 2025 - Jul. 2025] *London, UK*

- **Worked with different teams of** Developers, Product Managers, and Product Designers) in developing a **large-scale web applications** for the company's subsidiary.
- **Designed and developed** frontend UI architecture and Interfaces, consuming API's using **React.js, Next.js, Typescript, Tailwind**
- Using **Git** and **Github** for version control, code updates and code maintainability while staying in sync with team members, which ensures a smooth codebase environment.
- Writing tests scripts to ensure UI components function correctly, catch bugs early, and maintain a reliable user experience across updates
- **Deploy production ready** applications on hosting platforms (e.g) **Versel,** maintaining codebase while providing regular updates to Github master branch for auto deployment.

Web developer - **Freelancer**   [Jan. 2022 – Till Date] *Ibadan , Nigeria*

- Started my career as a freelancer where I develop **full stack web applications** for clients using **HTML, CSS, React.Js**, **Next.Js, Tailwind, Bootstrap, Typescript**, **Express.JS, Mongo DB, PHP, MYSQL, Laravel** and other relevant tools.
- Designed a full gadget e-commerce web application with **PHP (Laravel**), **Tailwind** and **MYSQL Database.** Integrated payment checkout with **Stripe**, coupon code discount functionality, guest checkout functionality, and a secure admin dashboard built with **laravel voyager** for managing product, stocks and income behind the scene.
- Designed and developed a counselling web application with **Next.Js, Tailwind Typescript**, and **Mongo DB**, that serves a means of booking meeting sections with a Therapist by paying the required counselling fee before a meeting scheduling form can be submitted. This web application also served as a personal portfolio for the client, with **stripe payment** integration and a secure admin dashboard to manage bookings and income.

Web developer – **G3 MultiChrome** [Intern]   [Oct. 2019 - Sep. 2021] *Delta, Nigeria*

- Worked on several projects as a **frontend engineer** where I designed smooth and responsive interfaces from scratch using **HTML CSS** and **JAVASCRIPT** and occasionally **Bootstrap**.
- Designed backend structures as a **backend engineer** with **PHP** and **MYSQL** database. Built well tested, secure and functioning **REST API's**

- Occasionally I work on both **front and backend projects** where I'll assist a small team of frontend developers to build UI's and integrate with backend API endpoints, while I focus fully on creating the API structures, endpoints and databases.
